WORKING WITH THE COMMUNITY

Zhang Yanchun Angelia

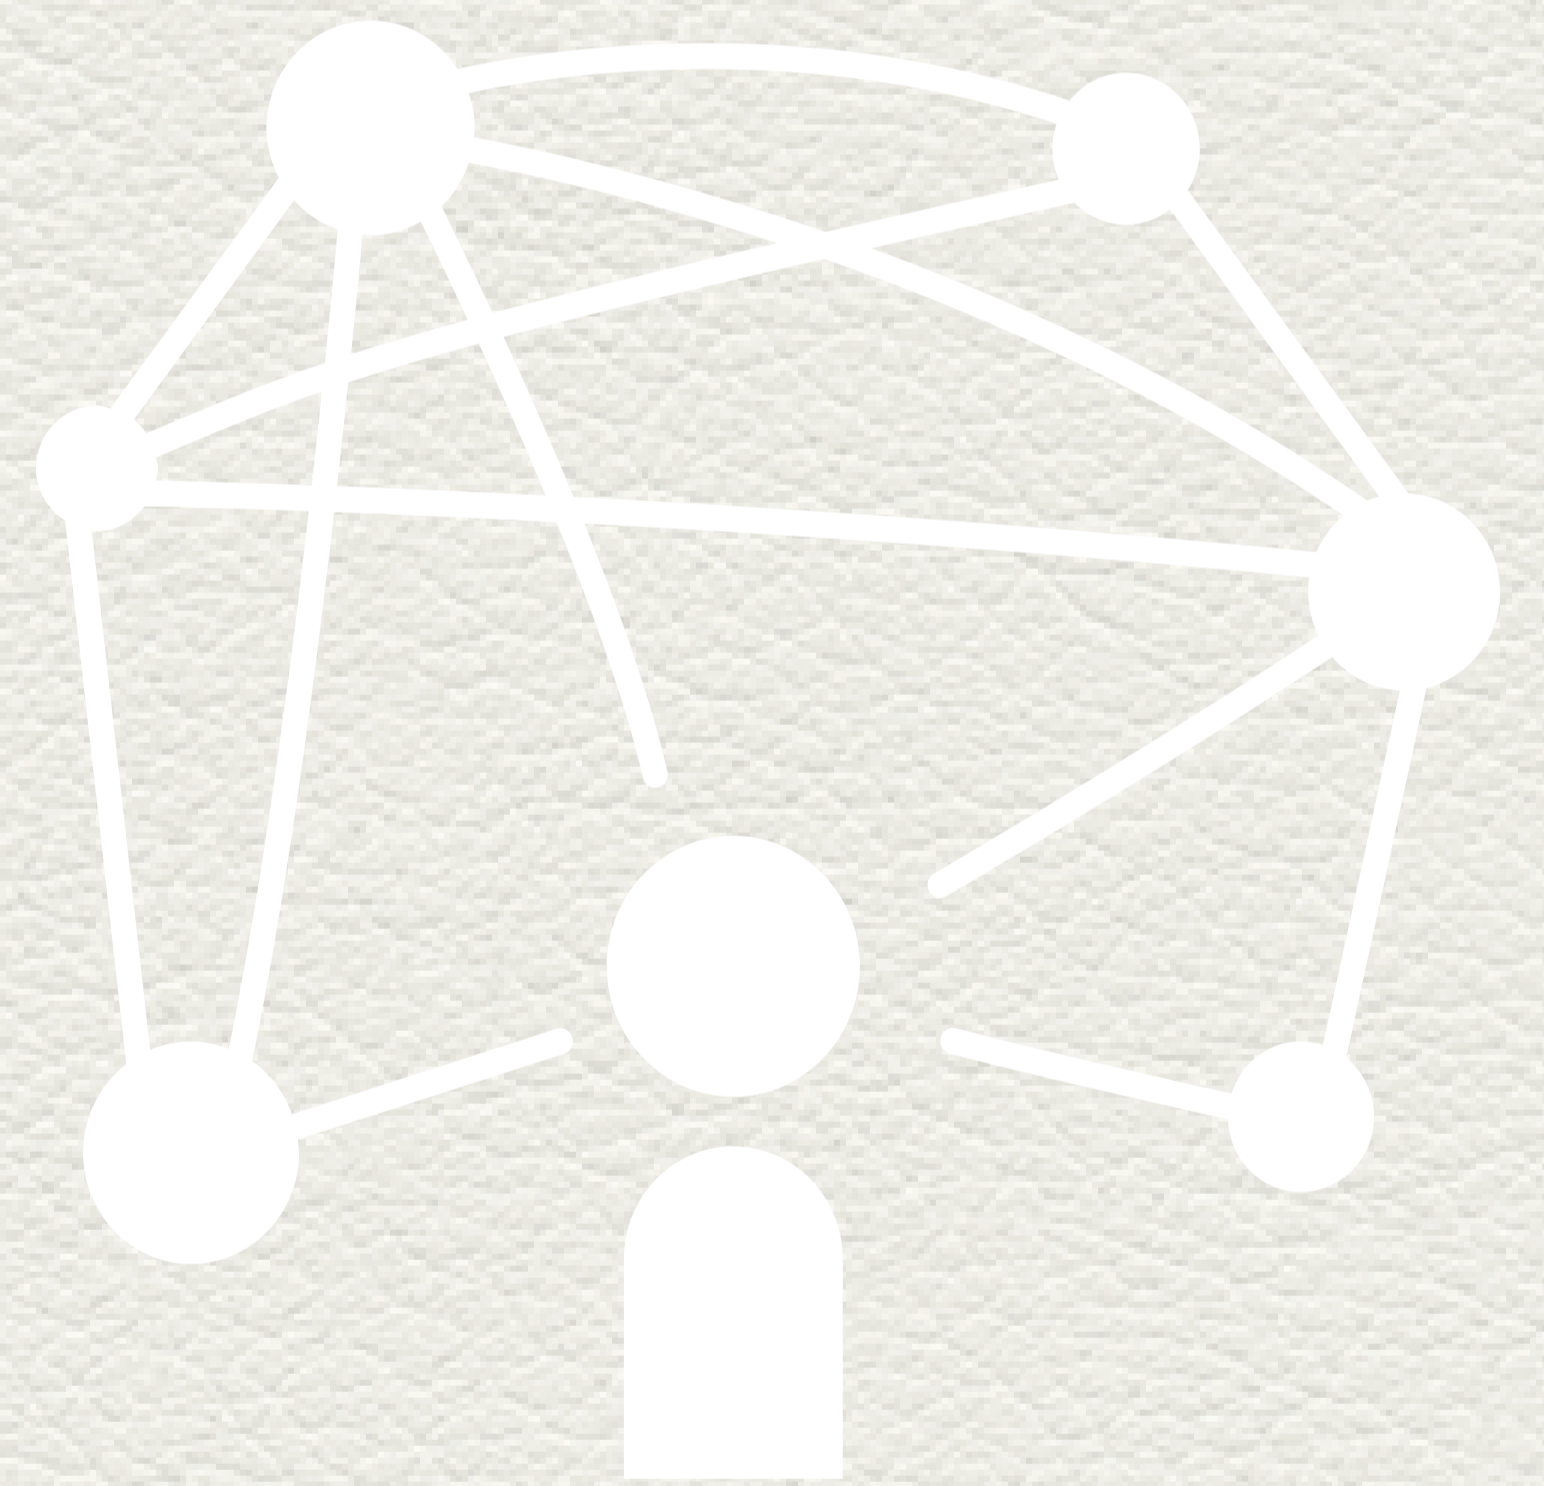

Cyber Wellness Co-ordinator

CHIJ (Katong) Primary School

A community approach to inculcating cyber wellness

As the school's Cyber Wellness coordinator, Angelia adopted a community approach in the implementation of the school's Cyber Wellness programmes.

She co-developed these programmes by working in partnership with various stakeholders, including parents who volunteered as Cyber Patrol Officers, and the Info-communications Media Literacy Council (IMDA) in the creation of a cyberwellness video 'Towards a Cyber Smart Community'. Currently, Angelia is still working closely with IMDA and the community to run events or programmes collaboratively, ensuring that the programmes can continue to be implemented in a sustainable manner.

IMPACT

The Cyber Wellness video 'Towards a Cyber Smart Community' was shown in all Primary schools on 6 Feb 2018 as part of Safer Internet Day organised by IMDA and at the ASEAN AMRI Conference.

Angelia also shared Cyber Wellness collaterals and materials with other interested primary schools. Angelia is also a member of the "Friends of Cyber Wellness" networking group and she has shared the school's Cyber Wellness programmes and implementation journey with the other coordinators and MOE personnel. Some schools who have worked with her team have already adopted the idea of a Cyber Wellness Mascot. The school's Cyber Wellness programmes was featured on MOE Cyber Wellness Student Ambassador Training Handbook, and identified by MOE for Media Release.
