Networked Learning Session for South Zone POA Teachers, 1 October 2019

Teachers' Reflections

What made you join the Subject Chapter?

I welcomed the idea of learning from fellow colleagues to improve my teaching in school and my personal development.

How has your participation in the Subject Chapter improved your instructional practice and student learning in your class?

I learned a lot from the rich sharing of instructional practices by various team members. They have helped me improve my pedagogical practices and gave me new ideas and insights to explore to make teaching and learning more effective.

In your opinion, do you think being in a Subject Chapter benefits everyone, regardless of one's number of years in service?

Yes. It should not be the number of years in service that is critical to being in Subject Chapter. More importantly, it should be the willingness and active participation to share and build the POA teaching fraternity

What would you say to a teacher who hasn't joined any Subject Chapter?

Come and listen. Come and learn and grow. Come and build the POA teaching fraternity.
